

Feature Guide: Artist & Album Pages

Last Modified on 09/05/2025 10:52 am PDT

At a glance

There are two ways to create a new Artist or Album Page:

- from **Playlist Settings**
- from an **Artist Profile**

Create a Page from Playlist Settings

For this option, you'll need to either [create a Playlist](#) or choose an existing Playlist to convert into a Page.

1. Open the **Playlist menu (⋮)** and select **Playlist Settings**.
2. From the **Playlist Settings** window, select the **Presentation** tab.
3. Under **Choose a design**, select a radio button for either **Artist Page** or **Album Page**.

Save Playlist

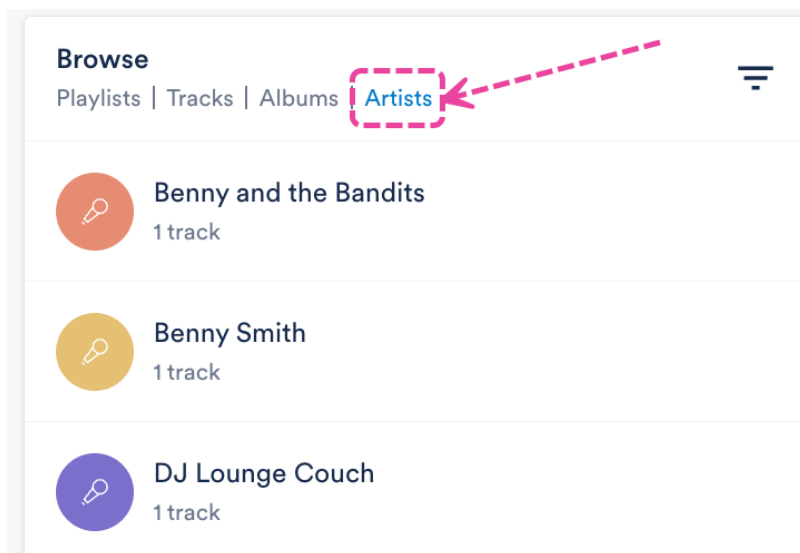

The screenshot shows the 'Save Playlist' window with three tabs: 'Playlist Info', 'Presentation', and 'Alias Metadata'. The 'Presentation' tab is selected and highlighted with a green underline and a pink dashed border. Below the tabs, under the heading 'Choose a design', there are three radio button options: 'Default playlist', 'Artist Page', and 'Album Page'. The 'Artist Page' option is selected, indicated by a green dot and a pink dashed border. Below the radio buttons, there is a text description: 'Create an artist page to showcase your artist with an artist image, bio/release details, videos, social links and more. [Find out more.](#)'

4. [Visit this article for information on customizing your Page.](#)
5. Click the **Save** button.
6. From the **Save Playlist** window, click the **Save Playlist** button.

Create a Page from an Artist Profile

For this option, you'll need to have a list of **Artists** in your DISCO. [Artists are created automatically](#) when you upload Tracks containing Artist metadata.

1. Open an **Artist Profile**.
2. From the **Pages** tab, under **Generate Page**, click the gray **Click here** button.
