# Managing file formats for Track and Playlist downloads

Since multiple formats are supported for individual Tracks in your DISCO, you can specify which file formats you'd like to make available for your recipients to download when sharing Tracks and Playlists.

# At a glance

Your recipients can also choose which formats to download from the Share page:

		More formats and options	Download	Save to DISCO
My	y Super Awes	some Playlist 💝		Download WAV
	Queen Serene: Queen Serene Blur Hairpin		()	Download MP3 Download AIFF
4	Salty Jordan Whitlock		(i)	Save to DISCO

### Downloading different formats from Track Share pages

When sharing Tracks, if you'd like to allow your recipients to choose which Track formats they'd like to download, use this share method:

- 1. Open the Track menu (:) and select Share.
- 2. From the Copy URL tab, copy the Regular track URL.

Share Track	×
Penelope Fresh Sugar World: Lost & Found

Stream only URL	Copy URL
https://s.disco.ac/stlljydtfynt	⇔ []

 This will open a Share page with all available formats available in the **Download** dropdown to the right of each Track:

**Note:** The **Download URL** will automatically download the MP3 of a track or the MP4 of a video when opened.

### **Downloading different formats from Playlist Share pages**

#### **Downloading individual Tracks**

When you share a Playlist, all available formats are attached to each Track. Recipients can specify which format they'd like to download using the **Download** dropdown to the right of the Track:
