Q: Can I make the Explorer columns wider?

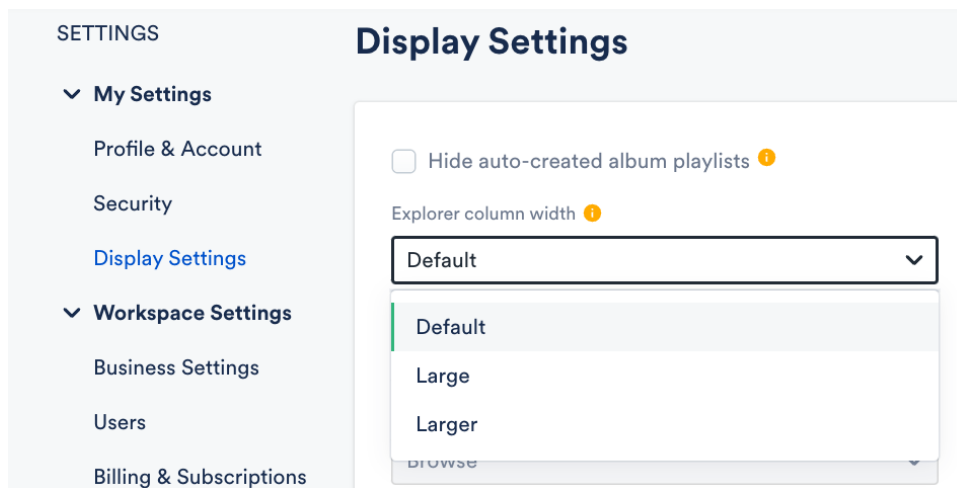

Q: Can I make the Explorer columns wider?

Yes!

1. Open the **Settings menu** (person icon) in the top right corner of your DISCO.
2. Select **Settings and Account**.

3. Under **My Settings**, select **Display Settings**.
4. Open the **Explorer column width** drop-down and select one of the three options:
 - **Default** (the narrowest setting, recommended for smaller displays)
 - **Large** (wider columns, suitable for most regular-size screens)
 - **Larger** (use this if you have long titles *and* a large display)

5. Click the **Update Display Settings** button.

Note: Changing your column width to **Larger** will leave you with a single column on medium-sized screens:
