Q: Can I make the Explorer columns wider?

Yes!

1. Open the **Settings menu** (person icon) in the top right corner of your DISCO.
2. Select **Settings and Account**.

3. Under **My Settings**, select **Display Settings**.
4. Open the **Explorer column width** drop-down and select one of the three options:
 - **Default** (the narrowest setting, recommended for smaller displays)
 - **Large** (wider columns, suitable for most regular-size screens)
 - **Larger** (use this if you have long titles *and* a large display)

5. Click the **Update Display Settings** button.

Note: Changing your column width to **Larger** will leave you with a single column on medium-sized screens:

The screenshot displays the DISCO application interface on a medium-sized screen, where the layout has collapsed into a single column. The interface consists of three main sections:

- Left Sidebar (Navigation):** Contains the DISCO logo, a search bar, and a list of navigation items including Browse, Starred, Inboxes, Discovery Suite, Catalogs, Auto tagged tracks, Tools, Contacts, Email Creator, Mailing Lists, Insights, and Watermarking.
- Central Content Area:** This area is highlighted by a red dashed box. It features a search bar at the top and a list of items under the 'Browse' tab. The items include 'Folder Uploads', 'Monplaisir - Fifty Seconds Of Rain', 'Default Theme', 'My Super Awesome Playlist', 'Mobile upload', 'Mobile App Playlist', and 'My Second DISCO Playlist'. Each item has a date indicator (e.g., '30 Jul', '29 Jul').
- Right Sidebar (Playlist Creator):** Contains a 'Playlist Creator' section with an 'Untitled playlist' and '0 TRACKS'. It includes a 'Save' button and a 'Drag files here, or click to import' instruction.

The interface also includes a top navigation bar with a search bar, a 'BULK UPLOAD' button, and a user profile icon. A help icon (question mark) is located in the bottom right corner of the right sidebar.
